

BATH TUB EDGING PROFILE//**BORDOFLEX** (FLEXIBLE EDGING)

Bordoflex

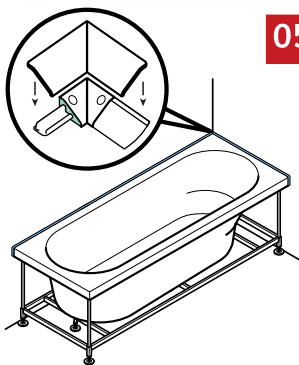

BORDOFLEX (FLEXIBLE EDGING) Flexible co-extruded edging in PMMA (acrylic) and PUR (polyurethane), provided with a biadhesive on the back. Nevertheless, the use of silicone to seal the profile to the bath tub and shower tray edge, combined with the biadhesive improves the adhesive performance. This profile, given its flexibility and particular shape, can be applied after installing the tub or shower cabin. The profile is available in natural and Ideal white.
